

EMUS Price Update Notification

Document ID: EMUS-PUN-1901

Date: February 11, 2019

Dear Valued Customer,

While we strive to manage the costs, efficiency and minimize any price increase to our customers, we find it necessary to raise the prices as our efforts to improve productivity, efficiency and reduce resource consumption continue to be outpaced by market trends of inflation, increased raw materials, energy and labor costs.

As a result, effective from March 11, 2019, we must increase the list prices on average by 3-8% for the EMUS products. Price increases applied to EMUS products differ depending on product's characteristics, manufacturing process, raw materials cost and similar. Our continuing goal is to deliver the best possible quality and service with the most favorable economics. This price update will help us to maintain and improve these standards.

We wish to take this opportunity to thank you for your business and we look forward to the privilege to be of service in the future.

Best Regards,

Mindaugas Milašauskas

Chief Executive Officer

EMUS, UAB
