

# G1 Cell Module - A/B type

Product Code: CM010G-A+B

## Introduction

**EMUS Cell Module** is the device that measures cell's voltage, temperature, and its own temperature. It broadcasts all measured values to the G1 Control Unit. Also, cell module using previously mentioned values regulates the balancing current to keep cell's voltage lower than the balancing threshold, while at same time keeping its own temperature lower than certain maximum value to protect itself from overheating.

## Applications

- Any lithium chemistry, series connected battery pack up to 80 cells using TOP/BOT isolators or CGM
- Energy storage systems
- Photovoltaics battery systems
- Electric vehicles
- Recommended up to ~200Ah. Higher cell capacity could lead to longer balancing periods

## Features

- Integrated port for optional external temperature sensor (100kΩ NTC by code ETS02)
- Integrated internal temperature sensor for overheating protection
- Digital I/O, Analog, proprietary serial interface for communication
- Balancing level indicating red LED
- Communication indicating green LED
- Maximum balancing current up to 1.70A
